PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence and Data Science student at Arunai Engineering College (CGPA 9.0/10) with an interest in Data Analytics, Data Engineering and Web Development. Experienced in academic project work involving Python, web technologies and AI-assisted development. Familiar with data visualization, machine learning concepts and application development. Seeking an internship opportunity to apply technical knowledge and develop practical skills.

EDUCATION

Bachelor of Technology — Artificial Intelligence and Data Science 2024 – 2028

Arunai Engineering College, Tiruvannamalai, Tamil Nadu | CGPA: 9.0 / 10

Relevant Coursework: Machine Learning, Data Visualization, Data Structures and Algorithms, Database Design and Management, Computer Networks, Web Technology

Class XII (Higher Secondary)

Auxilium Matriculation Higher Secondary School, Polur

PROJECTS

GiriGuide — Pilgrim Assistance Application

- Developed a visitor-focused application prototype to help people access information about Tiruvannamalai, including temple-related and visitor facilities.
- Frontend developed using React; PostgreSQL integration is pending. **Status:** Prototype.

Sentiment Analysis — Mini Project

- Classifies text sentiment into Positive, Negative and Neutral categories using TF-IDF for text feature extraction.

SkillBridge — Resume-to-Internship Gap Analyzer

- Major project in progress, focused on comparing a student's resume with an internship/job description to identify missing skills and skill gaps.
- Planned workflow includes resume and job-description input with skill-gap analysis. **Status:** Working.

ONLINE COURSES

DATA VISUALIZATION WITH R — IBM

- Explored data visualization concepts using R to represent and interpret data.

MACHINE LEARNING — IBM

- Developed foundational understanding of machine learning concepts and their applications.

100 DAYS OF CODE: THE COMPLETE PYTHON PRO BOOTCAMP — Udemy

- Building Python programming knowledge through structured lessons, coding exercises and practical projects.

RELEVANT SKILLS

Programming and Web: Python, JavaScript, HTML, CSS

Frontend Development: React

Data and Database: Excel, SQL, PostgreSQL

AI and AI-Assisted Development: Generative AI tools (ChatGPT, Stitch), AI-assisted coding and development, prompt design and iterative refinement, foundational AI and machine learning concepts

Tools and Platforms: Git, GitHub, VS Code
